

Course Handout Part II

Date: 02-8-2018

In addition to part -I (General Handout for all courses appended to the time table) this portion gives further specific details regarding the course.

Course No. : ECON F212/FIN F212
Course Title : FUNDAMENTALS OF FINANCE & ACCOUNTING
Instructor-in-charge : Krishna M
Instructor : Monika Gupta

1. Course description:

Introduction, standards and basic rules of accounting, Double-entry accounting system, recoding transactions, preparing trial balance, dealing with incomplete transactions, preparing the balance sheet, types of ownership, credibility and role of auditing, measuring income, adjustments to the accounts, preparing the statement of cash flows, recording sales revenue, reporting inventories and cost of goods sold, recoding capital assets, liabilities and interest, stockholders' equity and valuation of financial assets.

2. Scope and Objective:

This course is an introduction to the reporting system used by businesses to convey financial information to users external to the enterprise and the basics of financial markets and financial management. There are two parts of the course. In the first part of the course, primary emphasis will be on understanding the financial reports that are the end products of the accounting system- what information they provide about business enterprise and its financial performance. The accounting principles, conventions and concepts underlying financial reporting will be examined with the objective of developing ability to interpret and analyze financial statements. The second part provides a very brief overview of the financial markets, securities and fundamentals of valuation.
